📍 Lahore

SUMMARY

Final-year Computer Science student with hands-on experience in React Native, MERN stack, and Python-based machine learning applications. Skilled in building responsive mobile apps, integrating REST APIs, and developing real-world projects solutions. Seeking an app developer role to contribute to scalable and user-focused applications.

EXPERIENCE

Application Developer Intern

ACME One

📅 09/2025 - 11/2025

- Developed responsive mobile UI components using React Native.
- Integrated REST APIs to enable seamless backend communication.
- Contributed to an Augmented Reality (AR)-based mobile application.
- Improved app functionality by managing data flow and API handling.
- Built an Office Management System application for internal use.
- Strengthened debugging and problem-solving skills in a real-world development environment.

EDUCATION

Bachelor's in Computer Science

University of Central Punjab

📅 2022 - Present

FSC Pre-Engineering

Crescent College

📅 2020 - 2022

CERTIFICATES

💎 Speed Programming Participation – SOFTEC 2025

💎 Your Achievement

SKILLS

C++ Java Python React Native React JS

MERN Stack Project Management Interpersonal Skills

Problem Solving

PROJECTS

Pet Care Tracker (Android App)

Tech: Java, Firebase

- Developed a mobile app to track pet health records and medical history
- Implemented search functionality and disease tracking features

Email Spam Detector

Tech: Python, Machine Learning

- Built a spam classification system using ML algorithms
- Classified emails based on content using statistical models

E-commerce App (Frontend)

Tech: React Native

- Designed a mobile e-commerce interface with product listing, cart, and navigation
- Focused on responsive UI and smooth user experience

Real-time Facial Landmark Detection

Tech: Python, Computer Vision, ML

- Developed a real-time system to detect facial features using live camera input

University Management System

Tech: C++

- Created a file-based system to manage student and teacher records
- Implemented data storage and retrieval based on user input
